DETAILED ACTION

This action is in response to Applicants' RCE filed on 07/16/2010. Independent method **claim 37 has been amended to incorporate all the limitations of previously objected claim 38 which has been cancelled.** Since base claim 37 has become allowable, **dependent claim 39 is also allowable. Independent system claim 40 and its dependent claim 42 were already considered allowable** in the previous office action, and remain allowable. **Independent computer program product claim 43 has been amended** to overcome 35 U.S.C. 101 rejection in the previous office action, and has become allowable. **Dependent claim 45 is allowable** because it inherits all the limitations of allowable independent claim 43.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicants' submissions filed on 07/16/2010 have been entered.

Allowable Subject Matter

Claims 37, 39, 40, 42, 43 and 45 are allowable. The following is a statement of reasons for the indication of allowable subject matter:

Consider **independent claims 37, 40 and 43**. The best prior art found during the examination of the present application, **Brown et al. (US Patent Application Publication # 2003/0023684 A1)**, **Briggs et al. (US Patent Publication # 7,080,139 B1)**, and **Bogard (US Patent Publication 6,757,365 B1)** fail to disclose the graphical user interface described in claims 37, 40, and 43. Specifically, none of the cited prior art shows, describes, or suggests four different areas for displaying the chat transcript of the instant messaging session in the first area, with a topic list at the end of the chat transcript and two sub-topic tabs, such that when a topic from the displayed topic list is selected, the corresponding instant message transcript segment is shown in the second area; when the first sub-topic tab is selected, the corresponding instant message transcript segment is shown in the third area, and when the second sub-topic tab is selected, the corresponding instant message transcript segment is shown in the fourth area.

Therefore, **independent claims 37, 40 and 43 are considered novel and non-obvious, and therefore allowable**. Since **dependent claims 39, 42 and 45 inherit all the limitations of their base claims 37, 40 and 43 respectively, they too are considered allowable**.
